Klicker 2K

High Security Container Bolt Seal

ISO 17712 "H" Compliant · C-TPAT Compliant

A strong tamper-evident mechanical seal, the Klicker 2K consists of a hardened steel pin and bush moulded with resilient high-impact ABS.

With immense tensile strength and anti-spin locking mechanisms, the Klicker 2K is a fortified container bolt seal widely used in shipping, securing intermodal containers and ground transportation. It is the first container bolt seal in the world to feature a unique two colours in its design.

Features

- 1 Hardened steel pin and bush for added security.
- 2 The pin and bush are moulded with high-impact ABS to provide high tamper evidence.
- 3 Oval-shaped pin and bush to mitigate 'spin attacks'. The anti-locking mechanism prevents friction and only allows 1-way locking.
- 4 Identical sequential numbers on both parts provide greater security as it prevents parts substitution or replacement.
- 5 Engraved paired pin and bush for easier handling.
- 6 The bush is etched with name, logo, sequential numbering and barcode using permanent laser marking. Laser marking offers the highest level of security as it cannot be removed or replaced.
- 7 Two colours for improved product definition, visibility and identification, marking variations and increased operation efficiency.

Technical Specifications

PRODUCT

Material	Locking Length	Pin Diameter	Tensile Strength	Marking Area	Max Marking
Plastic pin and barrel: High-impact ABS	50 mm (0.04 in)	Ø 7 mm (Ø 0.28 in)	1500 kg	10 x 24 mm (0.39 x 0.95 in)	Serial no: 8 digits Barcode: 8 digits
Pin and bush: Hardened Steel					

OUTER CARTON

Carton Quantity	Dimensions	Weight kg/carton	Volume m ³ /carton	Standard Colours
250 pcs	585 x 360 x 200 mm (23.0 x 14.17 x 7.87 in)	17.15kg (37.81 lbs)	0.042 m ³ (1.483 ft ³)
